BlueLine® FormSelector™

The *BlueLine* FormSelector features the Facial Meter to measure the patient's interalar width of the nose which correlates to the selection of an appropriately sized denture tooth mould.

The fan style arrangement of the FormSelector presents the actual size of each maxillary anterior mould in order of width (small, medium, large), form (soft, bold), and length (short to long). This arrangement allows the dental professional to hold the cards to the patient's face for easy reference.

Step 1

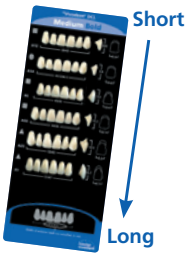
Select appropriate "width" of maxillary anterior mould

Step 2

Select desired tooth "form" (soft or bold)

Step 3

Select the length of the teeth



All BlueLine Esthetic Denture Teeth are backed by a 10-Year Warranty

Available in all 16 A-D and bleach shades
