## Lecturers

---

Prof. Dr. Nitzan Bichacho  
(Israel)

MDT Shigeo Kataoka  
(Japan)

Prof. Dr. Markus Blatz  
(USA)

Dr. Dan Lazăr  
(Romania)

MDT Oliver Brix  
(Germany)

Dr. Markus Lenhard  
(Switzerland)

Dr. Florin Cofar  
(Romania)

Assoc. Prof. Dr. Dan Pătroi,  
DDS, PhD (Romania)

Dr. Mirela Feraru  
(Israel & Romania)

MDT Florin Stoboran  
(Romania)

Assoc. Prof. Dr. Marko  
Jakovac, DMD, MSc, PhD  
(Croatia)

DDT Dragan Stolica  
(Slovenia)

# Program

Friday 21<sup>st</sup> April 2023

08:00 – 09:00 Registration & Morning Coffee

09:00 – 09:30 Welcome & Opening Ceremony

09:30 – 11:30 Prof. Dr. Nitzan Bichacho  
**Controlling Natural and Artificial Interfaces at the Smile Zone**

Rehabilitation of teeth or implants at the smile zone has always been a challenging task due to the need to combine structural strength of the restored tooth or implant and esthetic integration with the adjacent natural teeth in a healthy periodontal surrounding. The audience will gain an in depth understanding of the parameters and techniques in use today for achieving ideal modern restorations at the smile zone.

11:30 – 13:00 Prof. Dr. Markus Blatz  
**The CAD/CAM Ceramic Update in Esthetic Dentistry**

The recent evolution in CAD/CAM and ceramic technologies offers a whole new range of esthetic, less invasive, and long-lasting treatment options. This presentation will provide an update on esthetic treatment options with ceramics from conservative partial-coverage laminate veneers and onlays to resin bonded bridges and implant-supported restorations.

**CHECK OUT**  
all lectures in  
detail online!

13:00 – 14:00 Lunch Break

14:00 – 15:30 MDT Shigeo Kataoka  
**Similarity of Natural Tooth Morphology and the Three Basic Morphologies for Esthetic Prosthodontics**

The most important factor that leads to the completion of esthetic prosthetics is tooth morphology. By observing the natural tooth form from various angles, we will consider what kind of form a prosthetic should take to create a beautiful face and healthy periodontal tissues.

15:30 – 16:30 Dr. Dan Lazăr  
**Anterior & Posterior Dental Abrasion. What should we do?**

"The eye does not see what the mind does not know." This lecture will deal with the importance of the full understanding of the patient's initial state, especially with different patterns of wears, before establishing the correct diagnosis and continuing with the treatment planning.

16:30 – 18:00 Dr. Florin Cofar  
**Bottlenecks in digital dentistry**

Exploring meaningful use of available technologies, understanding bottlenecks and discussing workarounds, into ultimately rethinking design, beyond the classic mot-a-mot conversion from analogue dentistry.

18:00 End of Day 1

18:00 – 21:00 Prepare for the Party

21:00 – open end FACE Club Exuberant Joy Party

## Saturday 22<sup>nd</sup> April 2023

- 10:00 – 11:30 **Dr. Mirela Feraru**  
**Harmonizing Smiles in Challenging Esthetic Treatments Perio – Prosthetic approach**  
The lecture will detail the implementation of present concepts and technologies in modern perio-prosthetics including Model Based Restoration and Cervical Contouring – through a variety of esthetically challenged clinical cases, backed by current scientific knowledge.
- 
- 11:30 – 13:00 **MDT Oliver Brix**  
**Fascinating All-Ceramics – Beyond the Limits**  
All-ceramics are indispensable to the routine work of today's dental laboratories. In order to obtain successful results, a profound knowledge and understanding of the materials and technologies is required. A sound strategy must be developed that covers every step of the treatment process from the planning stage and the selection of the materials to the finishing of the restoration.
- 
- 13:00 – 14:00 **Dr. Markus Lenhard**  
**Esthetic modifications using direct composites**  
Often an esthetic modification desired by the patient, can be achieved using a minimal invasive approach using direct composites. The lecture will define the clinical step-by-step procedures of direct veneers, diastema closure, etc. and sums up the esthetic guidelines and functional aspects that need to be addressed.
- 
- 14:00 – 15:00 **Coffee Break**
- 15:00 – 16:00 **Dr. Dan Pătroi**  
**Minimally invasive preparations for restoring esthetics and function**  
Esthetic restorations that our patients need are no longer a requirement but a mandatory condition. Achieving a natural smile does not mean trying and guessing, making mistakes and correcting, but it means learning those principles that are compatible with achieving predictable long-term results, ensuring patient comfort and function.
- 
- 16:00 – 17:00 **MDT Florin Stoboran**  
**From IMPRESSION to EXPRESSION in Vertical Dimension**  
Focusing on a direct and uncompromising approach to reality: starting from pain symptoms, disproportionate dimensions, asymmetrical spaces, mixed colors; the interdisciplinary treatment plan has led to the freedom of expression that can be seen in the final result: functionally, esthetically and chromatically spectacular.
- 
- 17:00 – 18:00 **Prof. Dr. Marko Jakovac & DDT Dragan Stolica**  
**Digital protocol in minimally invasive dentistry**  
Dental medicine and fixed prosthodontics are changing their protocols. The digital revolution is making more and more inroads into everyday dental practice. Most dentists are familiar with some analog protocols and should be able to use them for digital dentistry. Protocols are very important for predictive therapy. The presentation will highlight digital protocol in one complex clinical case of full mouth rehabilitation.
- 
- 18:00 **End of Day 2 / Closing & See you next Marathon!**

# Further information & registration

## Course Languages

English with translation into Romanian. Romanian with translation into English.

Japanese with translation to English.

## Registration and fees

Ticket type	included features	Early Bird*/Full Price
<b>Full Access Package</b>	<ul style="list-style-type: none"><li>• 2 Days Lectures / 1 person</li><li>• Headset for simultaneous translation / 1 person</li><li>• Coffee breaks, Finger Food Lunch buffet / 1 person</li><li>• FACE Club Exuberant Joy Party / 1 person</li></ul>	<b>€ 265,00 with VAT incl. *</b> / € 345,00 with VAT incl.
<b>Full Access Package + 1 Extra Party Access</b>	<ul style="list-style-type: none"><li>• 2 Days Lectures / 1 person</li><li>• Headset for simultaneous translation / 1 person</li><li>• Coffee breaks, Finger Food Lunch buffet / 1 person</li><li>• FACE Club Exuberant Joy Party / 2 persons</li></ul>	<b>€ 325,00 with VAT incl. *</b> / € 405,00 with VAT incl.
<b>Exclusive Lectures Access Package</b>	<ul style="list-style-type: none"><li>• 2 Days Lectures / 1 person</li><li>• Headset for simultaneous translation / 1 person</li><li>• Coffee breaks, Finger Food Lunch buffet / 1 person</li></ul>	<b>€ 200,00 with VAT incl. *</b> / € 285,00 with VAT incl.

\* Early Bird available until 10.03.2023!
