

# Work faster, shine brighter

## OptraGloss® Extra Oral

Efficient extraoral universal  
polishers for CAD/CAM  
restorations

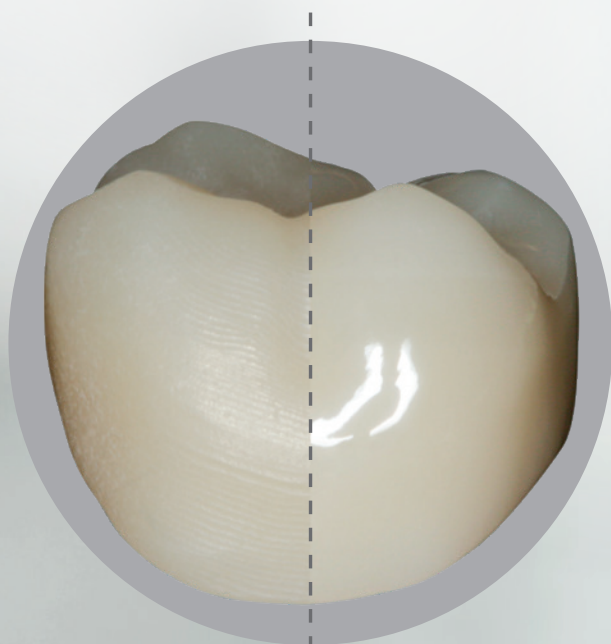

# Try it. Love it.

## Speed up your workflow even more with OptraGloss® Extra Oral polishers

High-gloss polishing in almost no time

From an unpolished to a highly esthetic surface in just a few minutes, shown on an IPS e.max® ZirCAD Prime restoration

Unpolished | Polished to high-gloss

- ✓ Can be used on oxide-ceramic, glass-ceramic, PMMA and composite materials, even on zirconium oxide prior to sintering and lithium disilicate before crystallization
- ✓ Easy and efficient application
- ✓ Cost effective due to long service life and further time savings
